ADM-10.9 (1966)

DD/S&T-3176-66

15 JUN 1966

MEMORANDUM FOR: Deputy Director of Central Intelligence

THROUGH: Deputy Director for Science and Technology

SUBJECT: Re-Allocation of SPS Position in ORD

1. This memorandum contains a recommendation for your approval which is stated in paragraph 6.

2. In a separate memorandum approval has been requested to make an offer of a position in the Analysis Division/ORD to Dr. [REDACTED] under the Scientific Pay Schedule.

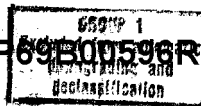

3. Although it has been the long range plan of ORD to provide an SPS position for the Analysis Division, at the present time no such position exists.

4. Because of the immediate need for key personnel in the Analysis program and the availability and qualification of [REDACTED] fill this need, it is proposed that an SPS position be established for the Analysis Division and that as an interim step authorization for an SPS position in the Physics-Chemistry Division/ORD be deleted. It is judged that this action will not adversely affect the recruiting program for the Physics-Chemistry Division at this time.

5. [REDACTED] has been fully cleared and has indicated his strong interest in the Analysis Division position. It is planned that [REDACTED] will take a principal role in the Analysis/ORD program concerned with the analysis and mathematical modeling of intelligence processes. He is highly trained and competent in his field which has been concerned with man-machine processes, computer simulation, mathematical models, and studies of human reliability, as these relate to the design and development of weapons systems. We believe that the addition of [REDACTED] to the ORD staff will represent a most important asset for our research and development program.

25X1A

6. It is recommended that your approval be given for re-allocation of an SPS position in ORD: that authorization for an SPS position in the Physics-Chemistry Division/ORD be deleted and an SPS position for the Analysis Division/ORD be established.

25X1A

[REDACTED]
Director of Research and Development

The recommendation contained in paragraph 6 above is hereby approved.

RICHARD HELMS
Deputy Director
